In Memoriam

DOCTOR JULIUS F. SCHMITTLE,

Born June 20th, 1864. Died September 19, 1897.

At a regular meeting of the Board of Administrators held November 1st, 1897, the following action was taken:

WHEREAS, the first assistant house surgeon, Doctor Julius F. Schmitte, whose death on 19th September, removed from the sphere of his usefulness an accomplished officer and worthy gentleman;

RESOLVED, that in the eight months of his service in the Charity Hospital, he discharged the duties of his office with credit to himself and satisfaction to the Board.

RESOLVED, that in the various relations of life he had proved himself a good citizen, an able physician and an honor to his state.

RESOLVED, that a copy of these resolutions be furnished to the daily press and a copy to his bereaved family.

ANNUAL REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,

For the Year Ending December 31st, 1897.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 7, 1898. }

To Murphy J. Foster, Governor of the State of Louisiana, and Ex-Officio President of the Charity Hospital Board of Directors:

Your Excellency—Through its Chairman the Board of Administrators of the Charity Hospital respectfully submits its annual report, to which will be found appended the reports of committees and of officers of this institution.

The past year has not been uneventful. One of that noble band of women, Sister Mary Gabriel, yielded her life in the service of the Hospital, as also Dr. J. F. Schmittle, First Assistant Surgeon, and Dr. J. H. Bemiss, of the Visiting Staff, gentlemen of the highest order of merit, nobility of character, and useful citizens. Their loss is greatly deplored. In a more humble sphere of life the good and faithful Sarah Breen, nurse for nearly half a century in the Maternity Department, ended her life's journey, beloved and respected by all who knew and could appreciate the simplicity and innate goodness of her nature.

The late appearance of yellow fever inspired the hope it could be controlled. To aid the Board of Health in its efforts, and the better to isolate the infection, the Beauregard School was selected for that purpose, with the sanction of the Public

School Board and the authorization of the Mayor, whom we sincerely thank. There were treated in this temporary hospital 216 patients, with a mortality of 23½ per cent. A detailed statement of the work accomplished is to be found in the reports of Dr. H. A. Veazie and Hamilton Jones, and in the House Surgeon's report. Too much praise cannot be accorded these gentlemen for their services, as well as to the Sisters and nurses who remained faithfully at their post to the end. They are entitled to our warmest thanks.

The improvements during the past year, whilst not many, have increased the efficiency of the service, as described in the House Committee's and Chief Surgeon's report. The Ambulance Department has been enlarged by the purchase of the adjoining property.

The Preparatory Room of the Miles' Amphitheatre renovated and added to, as required. The fire service has been increased, giving greater security, and the Pathological Department more fully developed.

Sterilized water is now distributed throughout the buildings. The department over which Mr. John Ponder presides, that prince of engineers, in his faithfulness, sound judgment and general utility, is above criticism, and in prime condition, as was expected.

The Training School for Nurses under the superintendence of Miss Robinson, and now of Miss Huyghe, continues, as in the past, of great benefit to the Hospital and to the community at large, in graduating competent and experienced nurses. The students of the past year deserve special praise for the faithfulness of their work and submission without complaint during the fever, when they were not permitted to leave the Hospital for several months.

It will also be seen from the report of the Expropriation Committee that we have effected the purchase of the square separated from the Hospital by Locust street, and on which we

will be enabled to erect the buildings needed to meet the growing wants of this institution. It has a frontage of 247 feet on Tulane avenue, by 430 in depth to Gravier street, and was purchased for \$58,000.00 The buildings have been torn down and the wreckage almost completely removed. The square will soon be in readiness for the projected buildings.

The first to be erected will be a Children's Hospital, with all the modern improvements and appliances. The plans have been submitted, perfected and approved.

Designed by the well known firm of architects, Sully, Burton & Stone, its construction will soon be begun, and it will prove an ornament to our city and a benefaction to our State.

For this work the State will owe a debt of gratitude to the philanthropy of a noble woman, Mrs. Richard Milliken, who, in furnishing means for the erection of this grand monument to the memory of a beloved husband, becomes a benefactress to the afflicted children of our State and a blessing to the poor, whose sorrows will be lightened and lives made happier in the knowledge that whatever betides, their precious ones may be cared for with equal facilities, comfort and skill as those of their more fortunate brethren.

As Administrators of the Hospital and as citizens of Louisiana, we return our sincere, grateful thanks for this munificent gift and great charity, the value of which is incalculable.

It will be seen from the report of the Treasurer and Finance Committee that the cash receipts for 1897 amounts to \$159,932.51; of this amount \$40,801.09 were from legacies and donations, which deducted left \$119,131.42 for the support of the Hospital. The actual disbursements amounted to \$120,875.02, being only three hundred dollars in excess of the preceding year, notwithstanding the additional cost of conducting the Isolation Hospital which amounted to \$2,500.00 over and above the ordinary expenses of the Hospital. The slight discrepancy between our income and expenses was more than covered by the surplus remaining over from the preceding year.

It must be borne in mind that whilst \$10,000.00 has been

added to our income by the generosity of our legislative bodies, it has not increased our actual income for 1897 very materially, as may be seen from the following figures.

Auctioneers' fees, average four years preceding:

Per annum	\$11,836
For 1897.....	9,092
	<hr/>
License four years preceding.....	\$2,744 Decrease.
For year 1897	4,245
	<hr/>
	2,590
	<hr/>
	\$1,655 Decrease.
<i>Gate fees average—</i>	
Four years preceding.....	\$4,060
For year 1897.....	2,3 0
	<hr/>
Decrease.....	\$1,750
	<hr/>
Total.....	\$1,750 Decrease.
	<hr/>
	\$6,149 Decrease.

From these figures it will be seen that our income during the year 1897, notwithstanding the ten thousand dollars appropriated, was only increased three thousand eight hundred and fifty-one dollars.

It is to be hoped the revival of trade, the appreciation of values and a more prosperous era throughout the country will raise our revenues to their former satisfactory standard.

Under the able superintendence of Sister Agnes, aided by the zealous, faithful and devoted Christian Sisterhood, of which she is the head, the domestic affairs of the Hospital have been economically conducted, and a wise, firm and gentle supervision exercised over employes and patients. Our thanks do not find expression in words as a measure of our feelings for their sincerity, patience and unselfish devotion. Their reward is not of this world. We can but thank them for what they have done and are doing.

Our thanks are also due the firm of Farrar, Jonas, Kruttschnitt & Gurley for valuable services rendered during the past year without compensation. Services which were onerous and irksome, but performed freely and cheerfully, in aid of this great charity.

We are also indebted to the firm of Spear & Escoffier, who first voluntarily offered to dispose of the houses on the square recently purchased and did this work gratuitously.

For valuable and efficient services rendered during the year by our accomplished and able House Surgeon, Dr. J. D. Bloom, and his competent assistants, Dr. Jno. B. Elliott, Jr., and Dr. J. M. Batchelor, and by Dr. O. L. Pothier, the Pathologist, who did good work in the Isolation Hospital and in the Pathological Department of the Charity Hospital, the commendations of the Board are due.

Also to the Visiting Medical and Surgical staff, for their gratuitous and meritorious work. To Mr. Ponder and his aids; the Librarian; the Druggist, Mr. John J. Simeon, and all other employes of the Hospital.

During the past year no complaints have reached the Board from any source, which is a matter for congratulation. All have done their duty cheerfully and satisfactorily.

Your efficient and worthy Secretary, Mr. Edwin Marks, whose scholarly attainments is shown in the clerical work of the Board, its correspondence, the keeping of its books, and in his general information on all that pertains to the Hospital, our thanks are specially due, as also to Mr. James R. Leake, our affable and courteous clerk, whose time is fully employed in the confining and trying duties of his office.

In closing this report, your Excellency, I desire to express my personal thanks and grateful appreciation to my colleagues for their effective co-operation and valuable counsel, and for their active labors on different committees.

To Mr. George Seeman, the able Chairman of the Finance Committee, who has given his time and knowledge to the responsible duties imposed, and to Mr. John T. Gibbons, the energetic Chairman of the House and Expropriation Committees, upon whom devolved the most onerous and taxing work of the Board, my colleagues will, I know, unite with me in returning our sincere thanks.

Respectfully submitted,

E. S. LEWIS, M. D.

VICE PRESIDENT.

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 7th, 1898.

To the Vice President and Board of Administrators:

Gentlemen—Your House Committee beg leave to submit herewith report of the principal work of improvement and repair for the past year.

AMBULANCE SERVICE.

The premises occupied for this service have been enlarged and improved. The adjacent property fronting, 30 feet on Tulane avenue by a depth of 116 feet, was purchased at the low price of \$2,550.00, and has been added to the establishment. The improvements bought with the property, consists of a well constructed two-story brick building with well arranged sleeping apartments, which are now used by employes. The yard room is particularly used and occupied as a carpenter shop. Eleven commodious stalls for horses have been erected, both well arranged and comfortable. The old sheds have been demolished and are replaced by new ones well adapted for the purpose. The Ambulance yard has been repaved where necessary, and the floor of the sheds laid with the improved sanitary pavement. The Ambulances have been kept in good repair and improved by the addition of rubber tires.

The Engineer's Department has been kept fully up to the standard under the able management and supervision of our Chief Engineer, Mr. John Ponder. His department is always equal to the call upon it. During the year, the two front offices

of the Hospital, together with the sleeping apartments on the second floor of each, have been heated with steam. A new chimney has been erected in the engine room to replace two old ones worn out in service.

One of the two large tanks in the attic of the main building is now supplied with filtered water by pipes extending from the filters.

The drying room of the Laundry has been improved by the introduction of increased heat.

In the Surgical Amphitheater, the Surgeons Preparatory Room has been improved. The walls, have been lined with marble to a height of five feet, and four large bowl marble lavatories introduced in lieu of the former ones.

The fire service has been added to and four new stations established.

The general work of repair and renovation, such as painting, calcomining, etc., has been very extensive and highly necessary.

The supplies for the year, such as meat, bread, coal and ice, have been satisfactory.

Respectfully submitted,

JOHN T. GIBBONS,

WM. G. VINCENT,

A. R. BROUSSEAU.

Annual Report of the Finance Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 7, 1898. } }

To the Vice President and Board of Directors:

Gentlemen—Your Finance Committee would respectfully report that the figures furnished by the Treasurer comprehending the receipts and disbursements for the past year, demonstrate that the institution was about supported on the revenues afforded by the State, but with nothing to spare. A remarkable parity exists from year to year in the expenditures required for the maintenance of the Hospital, while at the same time there is a tendency in the falling off in the receipts from the tax on auction sales, licenses and gate fees.

A comparison of these features of revenue for the average of the four preceding years—say 1893 to 1896—with the past year, 1897, exhibits the following differences:

Auctioneers' Dues—

Average for four years previous.....	\$ 11,836 per annum.
For year 1897.....	9,092
Decrease.....	\$ 2,744

Licenses—

Average for four years previous.....	\$ 4,245 per annum.
For year 1897	2,590
Decrease	\$ 1,655

Gate Fees—

Average for four years preceding	\$ 4,060 per annum.
For year 1897.....	2,310

Decrease \$ 1,750

Recapitulation—

Auctioneers' dues.....	\$ 2,744
Licenses.....	1,655
Gate fees.....	1,750

Total decrease \$ 6,149

The necessary enlargement of the institution, now about to be made, will augment the expenditures materially, and it will be imperative to have all revenues maintained.

Respectfully submitted,

GEO. SEEMAN,

R. E. CRAIG,

HUNTER C. LEAKE,

Report of the Expropriation Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 7th, 1898.

To the Vice President and Board of Administrators:

Gentlemen—In order that the Governor and General Assembly may be fully apprised of the purchase of the adjacent square for the erection of needed buildings for hospital purposes, we reproduce for publication in the annual report the report of your Committee, made December 6th, 1897, to which nothing is to be added beyond the fact that the means for the purchase were furnished from legacies to the institution.

The report is as follows:

Your Committee on Expropriation begs leave to report that the purchase of the entire adjoining square has been accomplished and the titles to the same have been passed and are now vested in the Hospital.

The property acquired has a frontage of 247 feet on Tulane avenue (not including the width of the street and side walk of South Robertson street, which the Hospital has the right to close), and a depth of 430 feet to Gravier street, between parallel lines.

The total cost of this property, amounting to \$58,007.13, is fully set forth in the detailed statement attached, showing price of each piece of property purchased and the name of the vendor. It is a matter of great satisfaction to all concerned that, notwithstanding the fact that the Hospital had the right of expropriation conferred on it, this authority was not used, nor was there

any occasion to do so, except in one case, where a friendly suit was instituted to secure a perfect title to a small property in which a minor was interested.

The legal advisers of the Hospital, Messrs. Farrar, Jonas, Kruttschnitt & Gurley, deserve great praise for prompt and assiduous attention in examining titles and passing all the requisite notarial acts, and, as usual, without making any charge for their valuable services.

In view of the fact that the plans and specifications of the Richard Milliken Memorial Building are now near completion, your committee would advise that the Board take immediate steps to notify tenants to vacate premises occupied in purchased square, and when so vacated, we would advise that the service of an auctioneer be engaged and that each building be sold separately, giving the purchaser a certain number of days in which to remove buildings purchased.

Respectfully submitted,

GEO. SEEMAN,

JNO. T. GIBBONS,

A. R. BROUSSEAU,

R. E. CRAIG,

COMMITTEE.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 7, 1898.

To the Board of Administrators:

Gentlemen—With the close of the sixty-sixth year of its existence, in unfaltering pace with medical and scientific advancement, this institution emerges upon the dawn of an era that means a radical control of its resources as a hospital, directed to specific results in sanitation, diagnosis, care of the sick, and rate of mortality. A brief summary of the year just ended gives a total of 8149 bed patients, representing 4956 whites and 3193 colored, that were treated, and of which 6447 were discharged, and 651 remaining on January 1. The daily average numbering 680 1-3.

The deaths that occurred were 1051, and give in total a death rate of 12 per cent., and the deaths occurring within 36 hours of admission, 343 in number, reduce this to the death rate proper of 9 per cent.

The Isolation Hospital, in addition, cared for 216 patients, with a mortality rate of 23 1-3 per cent.

The Maternity Service was exceptionally large, and records 271 births, with a mortality in mothers of but 2 per cent., including an unusual number of cases admitted in extremis.

The attendance in the Outdoor Clinics was 20,985 patients, to whom 62,652 consultations, inclusive of all departments, were rendered. The Clinics, in addition to the annual renova-

tion, have been re-arranged to meet the necessity of comfort, proper quiet and discipline, and the work in the various departments has been satisfactorily conducted.

The Ambulances are equipped with rubber tires, that insure much additional in comfort, and the commendable zeal and efficiency of the corps gives the pleasure of its perfected service. Its relief calls were 1263 during the year.

In the "A. B. Miles" Amphitheater, the Accident Service records 3131 cases, and the number of major surgical operations performed were 553.

The Registrar arranged and filed 1736 cases histories from the services of the various divisions.

The Pathological Department has very efficiently supplied the demands upon its service. Its pivotal purpose in medicine and surgery has been maintained with scientific accuracy and experimental confirmation, that gives the highest praise to the assiduity and competency of Dr. O. L. Pothier, the Pathologist. His interesting report for the year is submitted herewith.

The Training School for Female Nurses, now in the sixth year of its existence in thorough organization and excellent standing, assisting the essential service of the institution, and reflecting among the people of our city and State, through its graduates, the many virtues of this charity, is very satisfactorily reported upon through your Medical Committee.

The isolation building of temporary purpose, made necessary by the emergency of the year, proved demonstrably the wisdom of this provision, and that of the construction of a permanent building, for which the plans are now being drafted. This institution was in existence two months and sixteen days, with Dr. H. A. Veazie, as visiting physician, and Dr. H. P. Jones, as resident, aided by three Sisters of Charity and four pupils of our Training School for Nurses, the work of which is fully covered in the reports submitted.

To 32,481 persons the blessings of the institution were

distributed through the past year, responsive to their necessities and convenience by provision and adaptation to the best interests of the charge and the public weal.

Sterilized water has been secured throughout the buildings, ward accessories have been added, provisions by discipline, and water supply against fire have been made, and a letter chute that provides the mailing of letters to relatives and friends has been instituted.

Arrangements have been made to receive the various antitoxins and like products, fresh, at regular intervals, for their therapeutic use.

A telephone message service has been provided for the convenience of the Staff.

The Amphitheater, in its exceptional cleanly appearance, has been made more efficient by the marble wainscoting and lavatory in the Preparatory Room, directing the necessity of a like improvement in the remaining space, and the general renovation that it has undergone.

An expression of the virtue of charity that the benevolence of this institution and its broad scope for good has been made the inspiration of, conveying a true philanthropy, imbued by a love of our State and people, and in tribute to the memory of one who labored consistently and long in its interest and industry, vouchsafed the generous gift of Mrs. D. A. Milliken. The erection of this memorial, now in progress, marks a pride and satisfaction both in its praiseworthiness and the profound theme for which it will ever stand in humanity and patriotism.

For the entire square every arrangement, by designation and outline, has been planned, and the maternity, phthisical, nurses' and surgical isolation buildings but await the necessary funds for erection.

The gift of Dr. J. J. Castellanos, a distinguished alumnus of

this institution, in the carefully written history and compilation of official data that is of great merit and value as a Hospital possession, should be cherished.

The Hospital Service has been in every way satisfactory and thorough, equal to every requirement, and its favor and friends have grown with the exposition of its progress.

For the Sisters of Charity, in their unvarying diligence and constant interest in the housekeeping, nursing and welfare of the patients, no measure of thanks can express sufficiently appreciation and commendation.

The reaper, Death, has gathered from the field of this work, and in its several departments, valuable coworkers and friends: Sister Mary Gabriel, who for forty-four years served this institution in unselfish devotion to the sick and suffering of its charge, and a member of the Sisterhood for fifty-six years. Her life was exemplary, and with her good deeds enshrine the memory of her departed soul. Dr. Julius F. Schmitté, First Assistant House Surgeon, whose efficient service and sterling qualities of mind and character endeared him to all alike, was a grievous one, and a sorrow of our institution. Dr. J. H. Bemiss, a member of the Visiting Staff for a long term of service, and whose profound learning and attainments were in a devotional and unselfish spirit the privilege of the poor. Mrs. Sarah Breen, after forty-four years of unremitting service, self-sacrifice and devotion to its cause. Widespread was her humble influence, and well merited the esteem and affection in which she was held.

The Visiting Staff has been punctual in attendance, and is deserving of a full meed of praise.

Mr. J. J. Simeon, Chémist and Druggist, Mr. James Leake, Clerk, and Mr. John Ponder, Engineer, have been active and efficient in the works of their respective departments, and for which I beg to offer a grateful acknowledgment.

Thanks are due Dr. E. J. Mioton and F. W. Parham for material assistance in caring for outside patients prior to the provision for isolation.

My acting First Assistant, Dr. J. B. Elliott, Jr., and Dr. J. M. Batchelor, are commended for their satisfactory assistance.

This Hospital is now in the advance of all modern requirements, its purports, plans and provisions are such as will maintain its mission in a most approved excellence, contributing to science and education, by illustration and results, the benefits of an organized charity.

Respectfully submitted,

J. D. BLOOM,

HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 7, 1898.

To the Honorable Board of Administrators of the Charity Hospital:

Gentlemen—I beg to submit the following report of work done in the Pathological Department during the year 1897.

During the past year the following work was done:

Specimens of Urine examined.....	3,682
Specimens of Sputa examined.....	935
Specimens of Blood examined.....	993
Specimens of Tumors examined.....	147
Specimens of Pus examined.....	47
Specimens of Stomach contents examined.....	14
Specimens of Fluids examined	37
Specimens of Milk examined	1
Specimens of Urine for Gonococci and Bacilli-Tuberculosis examined.....	6
Specimens of Wax from Ear examined	2
Specimens of Marrow examined	1
Specimens of Kidneys examined.....	166
Specimens of Liver examined	162
Specimens of Spleen examined	115
Specimens of Intestines examined	8
Specimens of Lungs examined.....	144
Specimens of Heart examined.....	123
Specimens of Pancreas examined	34
Carried forward.....	6,617

Brought forward.....	6,617
Specimens of Stomach examined.....	3
Specimens of Hair examined.....	3
Specimens of Brain examined.....	5
Specimens of Feces examined.....	7
Specimens of Semen examined.....	2
Specimens of Saliva examined.....	1
Specimens of Calculus examined.....	1
Specimens of Bone examined.....	1
Specimens of Cultures examined.....	35
Autopsies held.....	223
Photographs taken.....	87
Micro-Photographs taken.....	14
Specimens mounted for museum.....	40
Specimens mounted for microscopical collection.....	159
	7,198

During the year the department has been equipped with three microscopes, one being for the special use of the students assigned to the department, enabling them to study and assist more accurately in the work of the department. Jars have been purchased to mount specimens kept for the museum.

Special arrangements have been made with the Pasteur Institute of Paris to have the Hospital regularly supplied with thoroughly reliable anti-toxic sera. Every two months, unless otherwise ordered, they send the Hospital 100 bottles, including the different anti-toxic sera prepared by the Pasteur Institute. This enables the Hospital to purchase at the rate of two francs per bottle an entirely reliable serum and also a fresh supply. These anti-toxic sera have been put under the special care of the Pathological Department, where they are kept in a special refrigerator purchased for the purpose, and kept at an unvariable temperature, insuring their preservation.

I would call special attention to the work done in the diagnosis of typhoid fever, by Widal's method, enabling a more rapid diagnosis in doubtful cases, and corroborating the diagnosis of typical cases.

This work, and the examination of the blood in malaria and other disease, is a feature of this year's work. We began in January with a total of 29 bloods examined, and in December we find it increased to 204, showing the appreciation of this aid to diagnosis.

With the past year began in the Pathological Department a totally new branch of work, a bacteriological laboratory. This laboratory has been the essential basis for the Widal's diagnosis of typhoid, and of different other septic conditions. We have been enabled to test and investigate with it the reliability of the sutures, ligatures, used and prepared in the Hospital, and after several tests have found them totally aseptic. Where its use proved invaluable, was during the last epidemic of yellow fever, enabling us to gather the material necessary to the investigation as to the cause of yellow fever. By its means we are enabled to say, that the claims of Sanarelli have been corroborated in the laboratory of the Hospital. Cultures have been obtained from the autopsies at the Isolation Hospital, giving the same reactions and the same results in animals as our control cultures of *Bacillus Icteroides* of Sanarelli. Inoculations of fourteen rabbits have been made in these experiments, and, though a small number, yet they presented the characteristic lesions described by Sanarelli.

Experiments have also been made to ascertain the efficiency of formaldehyde gas as a disinfectant for clothing and bedding. The tests made prove that, though formaldehyde is efficient as a surface disinfectant, its lack of penetrating power and its liability to polymerise, makes it an unreliable disinfectant for clothing and bedding.

If I may be allowed to suggest it, disinfection of clothing, etc., should be done by sterilization by steam under pressure; this is the only entirely reliable method.

In closing this report, I wish to commend the untiring assistance given me by the Assistant Pathologist, Dr. F. S. Mioton, especially during the prevalence of yellow fever at the Isolation Hospital, when most of the routine work was done by him, and I must also thank the House Surgeon, Dr. Bloom, in facilitating the work of the department.

Respectfully,

O. L. POTIER, M. D.,

PATHOLOGIST.

Report of Directress.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, December 15, 1897.

DR. E. S. Lewis and Dr. F. Loeber, Members of the Medical Committee, Charity Hospital Board of Administrators:

Gentlemen—The service of the Training School, both to the general public and the Hospital equipment, has been confirmed by the most acceptable proofs, and gives me pleasure in the honor of reporting upon its continued progress during the past year.

Our graduates have maintained with becoming dignity the vigor of its strength of purpose to the cause of humanity; they have adorned their profession with pertinent fitness, and have given the tenet of a nurse's calling the justly deserved merit of a public's approval.

They occupy positions of responsibility in many of the cities of our Southern States, and give to our own a favor of most successful work.

Through the dreaded danger of pestilence, with which our people have been recently threatened, they proved unswerving in their duty to the afflicted, unmindful of their position, and, I am proud to say, in addition to works of charity, declined the traditional opportunity of exacting an unusual and excessive remuneration for their services.

The organization of the Alumni Association with the close of the preceding year, has given increased zeal to their energies, banding them in closer union with the school's advances and benefits, and encouraging the opportunities for comparison of observation and mutual instruction.

It is my pride to witness their influence for the decisive gain from the moral of sincere devotion, kindly disposition and art of caring for the sick, and every encouragement by assurance and provision for their personal contentment and professional good fortune, has been my effort and pleasure.

The registry has been improved and perfected, and a promptness in the attention to calls has given the service and our graduates the reward of success.

The demand from our many friends have at times exceeded the number of available graduates, and to meet the urgency of such conditions we have supplied pupils of our school to assist the service. From this source, one hundred and forty-six dollars has accrued during the year, and which is contributed to the defrayment of expenses incident to the exercises of to-day.

The resignation of Miss Mary A. O'Donnell, as Superintendent, was accepted with the expiration of her term of office, and made opportune the advantage of securing one of our own graduates to the promotion, and the wholesome effect of this recognition upon the ambition and diligence of our pupils. Miss Ada Robinson, of the class of '95, was selected to fill the vacancy.

The number of applications for the year was 226, of which number nineteen were accepted. Eighteen pupils remained in the class at the close of the last session. During the year ten were released as unsuited to the work, and their places supplied from applications on hand.

The session closed with the gratifying duty of submitting to the Faculty of Lecturers a class of nine pupil Nurses and seven Sisters for the requisite examination of graduation.

They have, by their dint of industry, intelligence and proficiency, won our admiration and confident hope of the deserved honor of graduation.

The course on invalid cooking, so essential to the training of a nurse, and as an important adjunct to the school's instruction, has been amplified in its course, and with a thorough and practical teaching that the exhibited dishes of to-day give opportunity for judging.

Instruction in massage has been added as a course in which every nurse should have some proficiency, and our graduates in the city were invited, and availed themselves of the advantage, to join the classes so ably conducted by Miss L. Woodin, an experienced and thorough massuese.

The Isolation Hospital, wisely provided by the Board of Administrators for the protection of our unfortunate charges, had the service of three graduate Sisters and four pupil nurses of our school, securing for the plague-stricken poor the advantage of the benefaction that this prudence and forethought had vouchsafed.

The nurses' quarters are still those of the temporary purpose, and it is hoped that these strides and good results will bring the attention for special quarters within the series of your well considered improvements.

For the support and encouragement of the varying phases of the school's progressive efforts that your committee and your co-workers have given, I am gratefully thankful and pleased in the graceful compliment it gives to our esteemed Governor, Murphy J. Foster.

The excellent didactic teaching by our Faculty fulfills the purpose of instruction in a thorough manner, and for their willing assistance and generous aid, I have much to praise and thank them.

My recognition of the valued service of our able House Surgeon, Dr. J. D. Bloom, and his worthy assistants, the late Dr. J. F. Schmitte, Dr. J. M. Batchelor and Dr. J. B. Elliot, Jr., is very gratefully acknowledged.

Replete with every facility for proper and practical training, and which standard gives the pleasing honor to your wisdom in direction; the morale and charity lessons carried on the wings of its mission, gives to me the gratification of an humble part in its good in mercy and humanity.

Respectfully submitted,
SISTER AGNES,
DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, December 15, 1897.

Dr. E. S. Lewis and Dr. F. Loeber, Members of the Medical Committee, Charity Hospital Board of Administrators:

Gentlemen—The Faculty of the Training School for Nurses submits its third class of pupils for graduation honors, with the profound pleasure that their merit and proficiency has attained.

The gradational results in the school's progresses by way of applications, selection and class arrangement to the purpose of a test of excellence, has been most happy, and secures to the class requirements a ready reserve for occurring vacancies.

This has inaugurated a progress that is unmistakably to the best interest of its ulterior design in having its mission work and lessons in humanity interpreted through intelligent representatives, responsive to its charity and standard.

The success of the number that have borne the honors of previous occasions, re-echo the tidal influences of a widely distributed benefit, that with the pride of the institution, the Faculty finds a gratification in acknowledging.

The introduction of massage instruction during the past session, and the thoroughly re-arranged, practical lessons in invalid cooking, have the wholesome effect of insuring the nurse in the self reliance and adeptness that is required.

“The Recipes of the Charity Hospital Training School,” from the pen of our respected Directress, with its ready reference of food and dietary, maxims and cardinal points of a nurse's requirements, is presented to the graduates with the author's sincere affection.

The official reports of the Training School bear import to its lineal descent, organization and standard that, as an arm of this Hospital, should receive the stamp of official record in some manner, to the necessity of which I beg to direct your attention.

The lectures have been uninterruptedly carried on throughout the session, and the examinations have been regularly conducted. Every aid in the elaboration of the various courses has been secured, and the same system and discipline have been practiced as heretofore.

Dr. C. L. Horton and Dr. E. W. Jones have very efficiently aided in the work of instruction, and are commended to you for a continuance of their service by Faculty appointment.

Death claimed our colleagues, and friends, Dr. J. H. Bemiss, just prior to his active assumption of service, and Dr. J. F. Schmitte on the completion of his course; their sterling worth, intellectual attainments and sincerity in the work of charity and education has made their loss a public sorrow and our grievous affliction.

I have the pleasure to present to you for the diploma and medal of this school.

Miss Alexzenia Bethancourt, Mrs. Mary C. Felton, Miss Anna L. Fox, Miss Mary Hayes, Mrs. Mary C. Jones, Miss Margaret Lynch, Miss Carrie B. McCall, Miss Virginia Rhorer, Miss Rinda Williamson, Sister Ambrose, Sister Calista, Sister Perboyer, Sister Pauline, Sister Serena, Sister Sienna, Sister Teresa.

This encouragement to the science of medicine and education, nurtured and distinguished in a State public charity, has the weight of argument to invite the confidence of the people and beneficiaries in its administrative provisions of the Hospital and its State's government.

Respectfully submitted,

J. D. BLOOM, M. D.,

CHAIRMAN OF FACULTY.

Operations on the Female Organs of Generation—Continued.

Curettage	17	45	62	Chronic Endometritis.
Curettage	1		1	Retained Placenta.
Curettage		2	2	Carcinoma.
Alexander Operation		1	1	Prolapse of Uterus.
Alexander Operation		1	1	Retro Flexion and Retroversion.

Miscellaneous—

Tenotomy	4		4	Plaster Cast Applied.
Rectum	1	1	2	Ulcer.
Leg	4	2	6	Ulcer. Thiersch Grafting.
Stump	1		1	Ulcer. Thiersch Grafting.
Axilla	1		1	Sarcoma.
Rectum	1		1	Epithelioma.
Tongue		1	1	Sarcoma.
Knee		1	1	Ulcer Grafted.
Cheiloplasty	1		1	Hair Lip.
Hemorrhoids		1	1	Whitehead's Operation.
Back	2		2	Lipoma.
Rhinoplastic	1		1	Epithelioma.
Hemorrhoids	1	2	3	
Neck		2	2	Tubercular Glands.
Lip		2	2	Epithelioma.
Hair Lip	2	2	5	Plastic Operation.
Shoulder	1		1	Tumor Removed.
Buttocks	1		1	Gunshot Wound.
Nose		2	2	Epithelioma.
Leg	1		1	Skin Grafting.
Fistula of Jejunum			1	Maunsel's Operation.
Tubercular Glands	1		1	
Wiring of Patella	1		1	
Heel		1	1	Sarcoma.
Thigh	1		1	Epithelioma.
Tracheotomy			1	Carcinoma of Neck.
(Esophageal Obstruction	1		1	Gastrotomy.

LIST OF THE MORE IMPORTANT SURGICAL OPERATIONS—CONTINUED.

Operation.	Result.				Diagnosis. Remarks.
	Cured.	Improved.	Stationary.	Died.	
Miscellaneous—Continued.					
Tongue.....		1			1 Epithelioma.
Nose	1				1 Epithelioma. Plastic Operation.
Tenotomy.....		1			1 Neck.
Femur.....		1			1 Gunshot Wound.
Foot.....		1			1 Skin Grafting.
Appendicitis.....	4				4
Ophthalmic—					
Enucleation.....	1				1 Panophthalmitis.
Removal of Eye-Ball.....	1				1 Carcinoma of Face
Removal of Eye.....		1			1 Sarcoma.
Trephining—					
Head.....		1			1 Osteo Myelitis.
Skull.....	7	1	1	2	10 Depressed Fracture.
Skull.....					1 Fracture of Base.
Skull.....	2			1	3 Simple Fracture.
Skull.....				1	1 Cyst of Brain.
Skull.....	1				1 Compound Depressed Fracture.
Skull.....				1	1 Gunshot Wound of Brain.
Longitudinal Sinus.....	1				1 Punctured Wound.
Laminectomy.....				1	1 Gunshot of Spinal Cord.

Trephining—Continued.

Laminectomy.....					1	1	Gunshot of Spinal Cord and Fracture.
Laminectomy.....					1	1	Tubercular Spondylitis.
Laminectomy.....					1	1	Fracture of Vertebrae.
Colostomy		1				1	Carcinoma of Rectum.
Colostomy	1	1			2		

SUMMARY OF OBSTETRIC CASES IN 1897.

There were 270 cases of Obstetrics.

White	132	Multiparæ	133
Colored	138	Primiparæ	137

PRESENTATIONS.

Vertex	265	Left Occipito-Anterior	182
		Right Occipito-Anterior	47
		Right Occipito-Posterior	17
		Left Occipito-Posterior	7
		Uncertain	12

265

Breech	8
Shoulder	2
Foot	2—12
	277

MANNER OF DELIVERY.

Naturally	249
By Forceps	24
By Podalic Version	2
By Perforation of Skull	1
Cæsarian Section—Porro's Operation	1

There were 7 cases of Twin Pregnancy.

MORTALITY OF MOTHERS.

Of the 270 cases, 6 mothers died, making a mortality of little more than 2 per cent.

CAUSE OF DEATH.

Puerperal Eclampsia	4
Uraemia	1
Shock	1

The number of children born were 277.

Male	145	Living	148
Female	132	Still-born	29

Most of the still-born children were delivered before the seventh month.
